## **Dissemination in Learn2Work meeting, Brussels 7 March 2017**

During the fourth Erasmus+ Learn2Work Partnership Meeting in Brussels, held on 7 and 8 March 2017, the CEC presented the CO2Shoe project concept and results and explained the uses and advantages of the project's carbon footprint calculation tool to the Learn2work partners, which included a Danish association which supports production schools, an Italian shoe and bag design university, a Brussels-based think tank which promotes the interests of young people, and a Portuguese consulting company. These partners are involved in promoting the production school model of teaching and training in the area of footwear manufacturing through the Learn2Work project.

The CEC also distributed CO2Shoe promotional and informative material, namely the project fact sheet, the recyclable project folder, and the promotional umbrella with the CO2Shoe logo and an explanation of the environmentally friendly way in which it was produced.
